

## **Gábor Winkler-Nemes (b. 1981, Budapest, Hungary)**

Gábor Winkler-Nemes lives and works in Hungary. He is a formally trained artist and amateur musician who sees music - literally. As a synesthet, he has the gift of seeing music as colour. A man of broad interests, in addition to painting and music he extensively studied traditional stained-glass techniques, astronomy, and ancient cultures. Having developed a mixed-media technique that resembles stained glass, he is particularly interested in exploring the translucency of light and the synergy of music and light.
